

Tween 20: DR0040-500ML

Intended Use: For Research Use Only.

Package:

Description	Catalog No.	Size
Tween 20	DR0040-500ML	500ml

Reagents Supplied: One bottle of Tween 20 500ml

Storage and Stability: Store at 18-25°C. All performance claims are void after the kit expiration date.

Description: Tween 20 (Polyoxyethelenesorbitan Monolaurate) is used in a broad range of biotechnical applications. Tween 20 detergent (surfactant) formulated to be added to buffers and reagents for immunohistochemistry to decrease background staining and enhance reagent spreading during IHC in automated and manual procedures.

Procedures:

- 1. When used with Phosphate Buffered Saline or Tris Buffered Saline as a washing agent, add Tween 20 at a concentration of 0.05% v/v.
- 2. When used as a blocking agent, add Tween 20 at a concentration 0.05 0.5% v/v.

Uses/Limitations:

Not to be taken internally. Histological applications. Do not use if reagent becomes cloudy. Do not use past expiration date. Use caution when handling reagents. Non-Sterile.

Precautions:

Avoid contact with skin and eyes.

Harmful if swallowed.

Follow all Federal, State, and local regulations regarding disposal.
